POWER ON/OFF LOGIC

Components:

- U1: 74LVC1G126
- U2: 74LVC1G07GW
- U3: MC74VHC1G01DFT1G
- U24: MC74VHC1G01DFT1G
- U4: 74LVC1G126
- Q1: 2N7002
- Q2: 2N7002
- D1: SS14
- R1: 10k
- R2: 100k
- R3: 10k
- R4: 4.7k
- R5: 10k
- R6: 10k
- R7: 10k
- R8: 10k
- R39: 100k
- C1: 47uF
- C2: 4.7uF
- C3: 1uF
- C4: 10uF
- C24: 10uF

Notes:

- Jumper disables auto-power-on
- 10s button push for shut down
- No stuff C1 and C31 - co-layout C1 and C32, C31 and C33
- In LTSpice, interval of button push (+/- 10% RC value due to tolerance) was measured to be approximately 9.8-12s.
- The user also receives visual feedback from the power LED on the state of the module.
- Circuit was simulated in LTSpice.

Simulation Results:

- MAX VOLTAGE=60V
- CONTINUOUS CURRENT=0.115A
- R_DS_ON=1000mohm@10V/-1000mohm@4.5V/-1000mohm@2.5V
- MAX CURRENT=0.225W
- MAX WATTAGE=0.225W
- V_BE_GS=20V

OLED DISPLAY

INTERFACE SELECTION TRUTH TABLE

INTERFACE	BS0 (PIN 10)	BS1 (PIN 11)	BS2 (PIN 12)
I2C	0	1	0
4-WIRE SPI	0	0	0
8-BIT 68XX PARALLEL	0	0	1
8-BIT 80XX PARALLEL	0	1	1

This flex connector is mated to the UG-2864KLBGM01 OLED display from WiseChip. I2C was chosen for this use because it uses fewer wires and the signals come from the module (there is no microcontroller).

Note that pin numbers are flipped with regards to pin number for the display (i.e. 1 => 30 and vice versa)

POWER AND FAN TACH

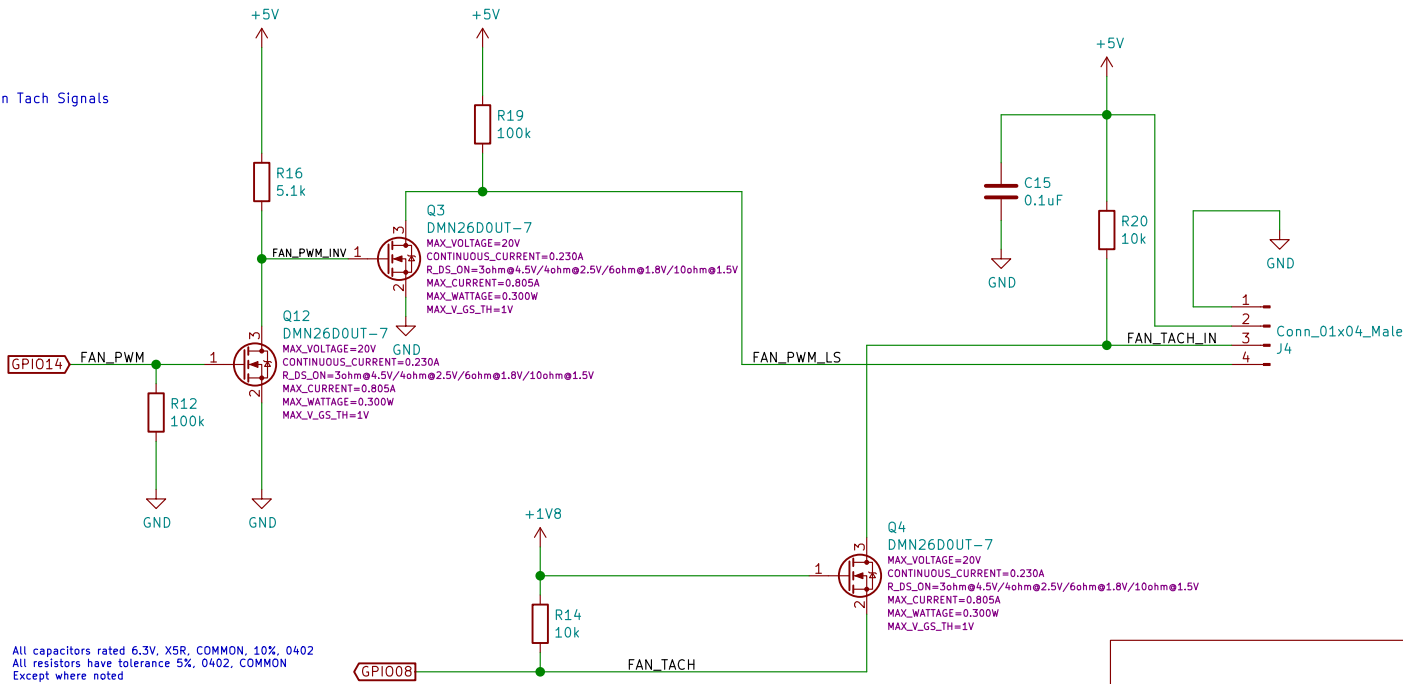

5V Power Protection

PLUG 5.5mm OD,
2.0mm ID

Note: for more robustness, additional power protection (over/under voltage or current, slew rate, etc) can be added. It is assumed that the hobbyist user will choose an appropriate power supply for their board.

Fan Tach Signals

All capacitors rated 6.3V, X5R, COMMON, 10%, 0402
All resistors have tolerance 5%, 0402, COMMON
Except where noted

USB 2.0 TYPE A HUB

No stuff the common mode choke, co-locate resistors to avoid stubs

Place C61 and C47 as close as possible to pin 14

Place C45 and C70 as close as possible to pin 34 without using vias.

NONREMOVABLE DEVICES CONFIGURATION

DESCRIPTION	NON_REM1 (PIN 22)	NON_REMO (PIN 28)
All downstream ports removable	0	0
Port 1 only is non-removable	0	1
Port 1 & 2 only are non-removable	1	0
Port 1, 2, & 3 are non-removable	1	1

All downstream ports were chosen to be removable to provide more options for the user.

MODE CONFIGURATION TRUTH TABLE

MODE	CFG_SEL1 (PIN 25)	CFG_SELO (PIN 24)
Configured externally over SMBus	0	1
Default config with bus-powered operation	1	0
Default config with self-powered operation	0	0
I2C EEPROM Configuration	1	1

Default configuration was used because it involved fewer outside devices.
